## Print&Cut Versatility

## Outdoor Durable

With a Roland VersaSTUDIO BN-20 20 inch inkjet printer, the compact printer includes everything you need to print and cut. Add stunning metallic effects, perfect for premium branding.

A complete low-cost solution, the BN-20 is a

## Cut Vinyl Signage

From pinstriping for vehicles and motorcycles to window signs and displays, contour cutting is essential to your production workflow. The BN-20 allows you to cut vinyl signs using a wide variety of fonts\*. \*The BN-20 supports TrueType and Open Type fonts.

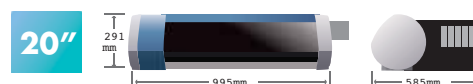

## Labels and decals for Outdoor Display

The BN-20 comes with award-winning Roland ECO-SOL MAX ink for outdoor signs, labels and decals. Graphics are easy to produce and durable up to three years outdoors without lamination.\*2 The BN-20 also supports water-based Roland FPG inks for exceptional indoor graphics.\*3

Outdoor Durable Inks  
**3**  
years

## A Complete Solution

The BN-20 allows you to print graphics up to size A2 or 480mm wide including crop marks for easy finishing. Featuring its own print management and design software, the BN-20 is a complete business solution in a box.

\*1 Metallic silver ink should only be used on garments as a spot colour as mixing it with other colours will negatively impact washability.

\*2 Three-year outdoor durability is based on accelerated weather tests conducted by Roland DG. Results may vary depending on the location and application. Some applications, including vehicle graphics, may require lamination.

\*3 Ink type must be selected at the time of purchase.

## Mobile Phone and Laptop Wraps

Roland Print & Cut versatility allows you to print and digitally die cut graphics in one seamless workflow for custom labels and decals, including mobile phone skins, laptop wraps and more.

**Roland**

### EGX-350 | Bringing your ideas to life.

Powered by a 20,000 rpm DC brushless motor, the EGX-350 desktop engraver quickly and easily produces a wide range of popular jobs with crisp text and clear graphics. Create flawless indoor signs, gifts and awards and custom rhinestone apparel.

includes **Software**

### EXG-30A | Unbeatable value in 2D engraving.

Equipped with advanced features, the third generation EXG-30A is cost effective for both in-house and retail engraving. The desktop device churns out a wide range of custom products such as badges, nameplates, gifts and awards. Pair it with Roland R-WearStudio rhinestone design software to produce engraved templates for custom rhinestone-studded T-shirts and gifts.

includes **Software**

### EGX-360 | The ultimate gift engraver.

**Offering cylindrical and flat engraving**, the EGX-360 boosts profits for gift shops, trophy shops and jewellery retailers. The versatile desktop device virtually eliminates the need to outsource jobs, delivering professional results and fast turnaround times. It produces gifts, jewellery, awards, ADA signs and rhinestone decorated apparel.

includes **Software**

See all brochures & specifications at [www.mountainrivercorp.com.au](http://www.mountainrivercorp.com.au)

### MPX-90 | Your Profit centre.

**Roland Photo Impact Printers** give jewellery stores, mall kiosks and photography studios the power of personalisation. The MPX-90 permanently imprints photos into flat items like pendants, dog tags, key chains and Zippo® lighters. The MPX-90 customises flat and curved objects including pens, cuff links and money clips. Using Roland's advanced Photo Marking System, both devices permanently imprint text and images into acrylic, aluminium, stainless steel, brass, gold, silver, platinum and metallic stickers.

includes **Software**

**They run quietly and leave no mess.**

# LEF-12 • 3D PRINTING

**Printing on 3 dimensional objects has the ability to turn the mundane into something individual and unique.**

The Roland LEF-12 allows you to print on 3D objects up to 100mm high in full colour plus white ink and a clear varnish on top which enables you to create any number of designs on an ever increasing range of consumer items - smartphone cases, photo albums, photo frames, head phones, even delicate materials that are normally too difficult to dry can be printed and cured instantly utilising the UV-LED lamps integrated into the machines design. Normally this type of printing is done by silk screening or pad printing which requires time consuming plate production or screen exposures but as the LEF-12 is an inkjet printer it does away with that.

**includes Software**
